

Bulletin

Projects & Improvements: 2012- 2013

2012 has been a successful year for the City of Burlington, and 2013 looks to be even better! Thanks to the efforts of the Mayor, City Council and staff, the City accomplished the following improvements in 2012:

- Constructed a new Scenic Byway / Visitor's Information Center / Burlington Chamber of Commerce office located at 520 E. Fairhaven. Thanks to our funding partners (the Washington State Department of Transportation Highways and Local Programs office, Burlington Lodging Tax Advisory Committee, and Skagit County) for their support! Stop in and take a look at this wonderful new addition to down town!
- Completed street, sidewalk, sewer and storm water improvements on Anacortes, Section and along smaller portions of Fairhaven and Hawthorne Streets
- Completed the new Grafton Park on Burlington Boulevard
- Rebuilt the curb on the North Burlington Boulevard roundabout
- Installed a new head works screen at the Sewer Treatment Plant and completed a new 20-year Comprehensive Sewer Plan (which demonstrates the City is in compliance with permit requirements - and has significant additional sewer capacity)
- Completed a repaving ("low impact development") project at the old fire hall site using porous concrete
- Prepped new soccer fields (along Whitmarsh Road north of the horse shoe pits) for use in 2013
- Installed a new interactive early literacy center (the Tractor) and new computers in the library, and developed computer skill and business development/marketing programs for individuals and businesses
- Restored a police officer position that had been previously cut
- Enhanced indigent defense services in our court
- Brought back the hanging flower baskets on Fairhaven
- Improved the City fiber-optic connections to traffic signals and sewer and storm water pump stations
- Partially restored the city code compliance inspector position (welcome back Dennis Yadon)
- Updated the Shoreline Master Program
- Installed public artwork "Sprouted Bumbershoot" at the Skagit Transit park and ride (thanks to Claude Blackburn)

The Burlington City Council has adopted a 2013 budget that will allow us to make the following improvements:

- Hire additional fire fighters and volunteers to enhance our response to fire and medical emergencies, and to reduce fire insurance rates in the future
- Install mobile data terminals and gps units in all of our fire department rigs to enhance the efficiency of response
- Build a new city webpage to improve access to city information by the public
- Webcast city council and other public meetings from our new webpage
- Pave portions of Bouslog Road and Highway 99 (thanks to Washington State Department of Transportation)
- Construct a pedestrian and bike underpass under I-5 along Gages Slough (adjacent to and in cooperation with Cascade Mall)
- Reconstruct a few major intersections and fine tune traffic signals on Burlington Boulevard to improve traffic flow (thanks to Washington State Department of Transportation)
- Purchase new financial management software to better account for and track city finances
- Establish an equipment rental and revolving fund to better plan and pay for replacement of expensive city equipment
- Revitalize the downtown task force and economic development team to guide downtown design and revitalization efforts

The city looks forward to a busy and successful 2013!

Bryan Harrison, City Administrator

Mayor's Message

This fall is an exciting time in the City of Burlington. We enjoyed another successful Harvest Festival with terrific weather and fun events. We just celebrated the opening of our Visitor Information Center, a first-class facility welcoming folks to our great city and community. We look forward to community events of all kinds being held there; summertime concerns, farmers' markets, Berry Dairy Day festivities and more!

But with the celebration comes a lot of hard work. The council and I have been working on our 2013 budget, carefully balancing increases in services to our citizens with sound fiscal policy. The Council approved the 2013 budget at the November 20 meeting. We would encourage all who are interested to contact us, or stop by one of the City Council meetings.

Additionally, I would like to thank everyone who was notified of the intrusion into the City's financial system in early October for their patience as we work to rectify the effect of this crime. City staff continues to work with Bank of America and the Secret Service to have city funds returned, and to increase security to the highest level possible to keep this attack from happening again. We will do our best to keep everyone informed of the outcome of this investigation as the process allows.

HELPING OTHERS

Through a friendly one week competition City of Burlington employees collected 2,082 pounds of food for the **Fallen Officers Food Drive** in honor of Deputy Anne Jackson.

Public Safety employees won for most pounds of food and City Hall employees won most pounds of food per person. Everyone came out a winner! Way to go!

New Art Work!

Have you seen the newest artwork in Burlington?? A Sprouted Bumbershoot donated by Claude Blackburn of Mount Vernon and designed by Jennifer Corio and Dave Frei of Cobalt Designworks from Vancouver, WA.

This colorful umbrella tree lives in the imaginations of the artists, who reside in the soggy Pacific Northwest. Incessant rains fuel this tree's growth while the parasol flowers provide refuge from the areas frequent downpours.

Claude was a local, long-time business owner of Claude's Carpet Cleaning and Dri-Eaz Products until his retirement in 1986. While enjoying retirement living in San Diego, Claude frequently walked along the picturesque Embarcadero boardwalk, a scenic venue on the bay with arts and crafts exhibits. There was one piece of art that he particularly enjoyed — the bumbershoots. When the bumbershoots were no longer on display along the Embarcadero he contacted the artists and discovered the art piece was for sale. He purchased the sculpture with the thought of donating it locally — and the City of Burlington was the lucky recipient! You can view the artwork at the Chuckanut Park-n-Ride facility on the north end of Burlington Boulevard just east of I-5/Chuckanut Drive.

Thank you Claude, for the generous, beautiful sculpture. It will be appreciated for many years by our citizens and visitors alike.

PARKS & RECREATION CLASSES

CARTOONING BASICS FOR KIDS Ages 7-12 yrs

Tuesday's 4 pm-6 pm
December 4, 11, 18
4 weeks for \$40

Learn how to draw your favorite cartoon characters!

Look for NEW more advanced classes held on Saturday's in January!

WATER COLOR FOR KIDS Ages 7-13 yrs

Wednesday's 4:30 pm — 6 pm
December 4, 11, 18
3 weeks for \$30

Holiday themed projects!

HATHA YOGA Ages 13 & up

Thursday's 5:30 pm — 6:45 pm
\$24 per month if paid by 1st or 2nd Thursday.
\$10 Drop in — *first class is FREE for new students*

All levels welcome to attend this class that blends traditional Hatha Yoga poses with emphasis on breath and inner awareness.

**BURLINGTON
PUBLIC LIBRARY**

SPECIAL TEEN EVENTS

Silent Library

Wed., Jan. 16 / 4:00-6:00 pm

That's right. We're hosting another episode of Silent Library. Bring a strong stomach and machine washable clothing.

But most of all, remember...
SILENCE!!

Nail Art

Thurs., Feb. 7 / 3:00-5:00 pm

Create fantabulicious designs like summer citrus, black lace, argyle and light burst. Step by step instructions and all the supplies you'll need to paint your nails salon-style.

Police Department

The Community Resource Officer Position has been filled!

On October 3, 2012 I took over the position of Community Resource Officer. The position has unfortunately been vacant for over a year and from the contacts that I have already made with community members, it has been noticed.

The position's essential functions include the development and implementation of a variety of crime prevention, safety, and community relations programs for our communities. In addition to those functions are the identification, risk assessment and tracking of gang presence in our community. I also serve as the School Resource Officer and supervise our Citizen Patrol Unit.

Over the past week, I have spent time updating information for the position and contacting our local schools to let them know what services I have to offer. I plan on contacting many of the local businesses this month to present the same offer.

Some examples of the services provided are:

- Establishing and Sustaining a Neighborhood Block Watch Program
- Fraud/Identity Theft/Forgery Presentations
- School Presentations (Law Enforcement as a career, etc.)
- Presentations of Available Programs for Business and Service Organizations

If you are interested in a program being brought to your neighborhood, business or organization please telephone or email and I'll see how I can help.

Officer Jed Cates, *Community Resource Officer*

Phone: 360-755-0921 Weekdays 8:00 am to 4:00 pm

Email: jedc@ci.burlington.wa.us

CHRISTMAS TREE DISPOSAL

December 26 — January 31

Residents living inside the *city limits* of Burlington may haul their Christmas tree to the **FREE Self-Service Christmas Tree Disposal**

December 26, 2012 to January 31, 2013 at the City Shop located at:

951 S. Section Street

Burlington is on track for the future!

It is time to pull together some key elements of the long range plans for Burlington! There are still goals to be set and pieces to put in place to ensure great quality of life for generations to come, here in the center of the region. 2013 promises to be a very interesting year for land use issues and opportunities.

Likely the most fun project will be a study by the University of Washington Green Futures Lab of the long term future redevelopment of the Retail Core in the I-5 corridor in an environmental context that also looks at cleaning up stormwater and greening up the area with low impact development approaches. Lots of ideas will be presented and there will also be a Technical Assistance Panel put on by the Urban Land Institute. Do we want more affordable housing for people who work here? Do we need design ideas for redeveloping some really old and underutilized sites? Are we looking for ways to keep visitors here longer?

Burlington is also partnering with the Skagit Council of Governments, the Port of Skagit and all the local jurisdictions on a major update of regional plans for industry and economic development in 2013. The city is putting together a survey of local businesses as part of that project, with the goal of developing an

accurate data base that will be maintained over time. This will ensure that future actions to change zoning or look at other components will have accurate data and information available.

Burlington is a special place, not only because it is flat with beautiful riverfront and mountain views for people to walk and bicycle, but also because the central location in the region attracts a very interesting mix of business and industry, and provides a regional hub for visitors to the area.

The Skagit Council of Governments (SCOG) is developing a Regional Nonmotorized Plan that will identify and set goals for major east/west and north/south connections, and encourage more pedestrian and bicycle friendly routes throughout the area. Getting the plan together for bicycling and walking through Burlington, connecting the Retail Core in the I-5 corridor to Downtown with the brand new Welcome Center opening at Railroad Park, and figuring out the design standards of street improvements for arterials and collectors will be both fun and challenging.

And there is more to come! There are LOTS of great ideas to build on.

Other classes offered through Burlington Parks & Recreation

- **Family Tiger Martial Arts**
Ages 5 yrs & up
- **Tiny Tigers Martial Arts**
Ages 3.5 yrs — 5yrs
- **Microsoft Business Excel Essential 4 hr classes**
- **Financial Workshops**
January 7 — February 11

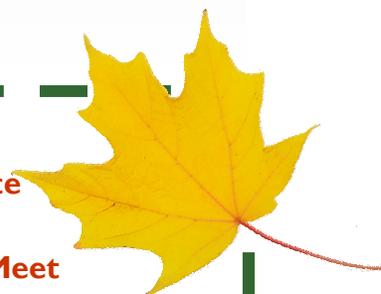

More SPECIAL EVENTS coming soon!

- **Daddy 'n Daughter Sweetheart Dance**
Friday, February 1
- **Scrapbooking & Craft Supply Swap Meet**
Saturday, April 13, 9 am — Noon
- **Kids Giant Garage Sale** — Sat., April 20, 9 am-Noon
- **Order Up! Vendor Party** — Sat., April 27, 9 am-2 pm

FLOOD & NATURAL HAZARD REDUCTION PUBLIC INFORMATION BULLETIN #40

Fall 2012

This Bulletin is being sent to you because your property has been determined to be in the floodplain.

The National Weather Service has changed their forecast several times this year, the latest including the potential for flooding via the warm tropical rains coming from the ocean. With the potential always out there for concentrated rain, resulting in a flood, everybody needs to be prepared! Everyone in Burlington should already be prepared for disaster because of living in the floodplain, and that includes earthquakes that could result in flooding in the event of a problem at one of the upriver dams. Keep that Emergency Kit updated and have your family plan organized at all times!

Dike District #12 has a systematic plan for enlarging the levees so that they will first qualify for credit to help keep flood insurance rates lower, and eventually, they will provide 100-year flood protection under federal standards. The final project design will add height to the improved levees as needed. Construction is underway at the upriver side of Gardner Road Boat Launch Ramp, and the Shoreline Permit is issued for the stretch extending to the Whitmarsh Road crossdike.

New proposed National Flood Insurance Program rate maps were issued June 30, 2010, and a timely appeal was filed by the City and others on how much water gets here. The Director of FEMA has placed all new map adoptions on hold because they are changing their computer modeling (LAMP) to give some credit for existing levees, even when not certified as providing 100 year flood protection. No dates have been identified for action by FEMA.

The related question of how much water gets to Burlington in a flood event, called flood hydrology, is the subject of a request for a review and decision by a Scientific Resolution Panel. This request will likely be held until the new Levee Analysis Mapping Approach (LAMP) is approved, the restudy is funded, and maps are available to see the outcome.

Local Flood Hazard Areas

There are three flood zones in the City Limits of Burlington, the Floodway (river side of the levee), the 100 Year Flood Zone and the Special Flood Risk Zone. Most of Burlington is in the 100 Year Flood Zone.

The Special Flood Risk Zone includes all land within 300 feet of the landward toe of the levee. All structures must be designed so that floodwaters can pass underneath and there is no occupied space below one foot above the 100 year flood elevation, unless the site is within 100 feet of the levee where nothing can be built. All property in Gages Slough that is three feet or more below the 100 year flood elevation is also designated as Special Flood Risk.

The goal for Burlington is to get credit for the levees when the 100-year flood elevations are established on the Flood Insurance Rate Maps. This is only possible if the levees are certified as having 100-year flood protection and the work is accredited by FEMA. The process will take quite a few more years to complete.

Levee enlargement work started in 1990 and earthwork is still underway. Dike District #12 is focused on completing the levee work at the upstream end by Lafayette Road, then completing the work from the Gardner Road Boat Launch Ramp to the Railroad Bridge. This will give the best flood protection in the shortest timeline.

Flood Safety & Disaster Preparedness

Every home needs to be prepared and STAY PREPARED! Review your Flood procedure at home with your household and take the time to put your Emergency Preparedness Kit together, or check your flashlight batteries in your existing kit. Remember, a supply of drinking water, emergency food and first aid kit are the bare minimums, along with flashlights. In addition to the basic three day supply of food and water, consider having supplies for sheltering for up to two weeks. Keep a small “grab and go” kit for your place of work with food, water and first aid supplies. For the emergency kit in the car, add flares, jumper cables and seasonal supplies.

There is an excellent FEMA publication entitled “Are You Ready? An In-depth Guide to Citizen Preparedness” available. This publication offers disaster information for natural hazards, technological hazards and terrorism. It will guide you for preparation in advance and recovery from a disaster. If you want to order a free copy for your home, call 1-800-480-2520. On the internet, <http://www.fema.gov/areyouready/> is the website link. A copy is available in the Burlington Public Library. **THIS COVERS THE BASIC DISASTER SUPPLIES KIT IN DETAIL.**

Earthquakes are an example of a disaster that cannot be predicted and that is not seasonal. Be prepared at all times!

Substantial Improvement/Damage Requirements

The National Flood Insurance Program requires that if the cost of reconstruction, rehabilitation, addition, or other improvements to a building equals or exceeds 50% of the building's market value, then the building must meet the construction requirements for a new building. Substantially damaged buildings must also be brought up to the same standard. The major issue is elevating the structure one foot above the 100 year flood elevation, along with all mechanical equipment, ductwork and electrical equipment, and installing properly located and sized vents. However, if you are located in the Gages Slough Special Flood Risk Zone, “breakaway walls” are required below the 100 year flood elevation, and they must be designed by a licensed structural engineer.

Property Protection Measures

Let's get started on improving flood protection in your home! Staff is available to provide site specific flood and flood-related data, make site visits to review flood, drainage and sewer problems and to advise and assist on retrofitting techniques.

Stop by the Permit Center or give the Building Department a call at 755-0077 and let the city provide you with technical assistance on improving flood protection in your home. A site visit will be scheduled at your convenience to put a checklist together for home flood protection improvements. Staff is also available from the Public Works Department if additional assistance is needed to assist with drainage and sewer problems.

If you want to do your own research, here are some of the recommended FEMA technical bulletins that you will find at the Burlington Public Library and the Building Department for your use:

- **Homeowner's Guide to Retrofitting, FEMA-312**
- **Design Manual for Retrofitting Flood-prone Residential Structures, FEMA-114**
- **Protecting Building Utilities from Flood Damage, FEMA-348**

Take a few minutes to look over the possible areas where you may need to floodproof important parts of your home. A good example is protecting utility systems. This is one of the easiest and least expensive retrofitting methods to accomplish. Whether it is elevating, relocating, or anchoring; items such as electrical panel boxes, furnaces, water heaters, washers/dryers and heating fuel tanks are typically very cost effective items to upgrade. There are also recommendations for drainage and crawl space improvements.

If you have a newer (post 1985) home, check to be sure these items have been taken care of when the home was constructed. Identify the potential for moving essential items and furniture to upper floors or the attic of your home. Materials like sandbags, plywood, plastic sheeting, and lumber handy for emergency waterproofing can already be on hand. This action will help minimize the amount of damage caused by floodwaters and requires minimal storage space.

Flood Warning System

Each and every citizen has a role to play in the event of a flood. **BE PREPARED!!!** The Burlington Flood Emergency Team prepares and coordinates activities needed to be ready for any flood event with the involvement of all the responsible agencies.

The procedure for warning the public is coordinated through the Skagit County Department of Emergency Management. The Emergency Alert System is activated when necessary and includes the following local radio stations:

KBRC - 1430 AM ■ KWLE ■ 1340 AM ■ KAPS - 660 AM

If evacuation is necessary, there will also be door-to-door notification and loudspeakers broadcasting from public safety vehicles in the neighborhood. Flaggers and/or portable signs directing traffic will be stationed at key intersections along the Evacuation Route.

Today, there are several neighborhoods in the Neighbor-to-Neighbor notification plan for very early warning. Contact your neighbors to ask if they want to be part of taking responsibility for each other, through a simple Telephone Tree, and call the Planning Department to get on the list. Now is the perfect time to identify your block captains and work together to BE PREPARED. The City is working with the 911 center on the latest ways to contact everyone in the event of an emergency, so stay tuned!

Now is the time to sign up for automatic notification of Local Emergency Alerts. For those of you with access to a computer, you can sign up at the website www.Skagit911.com then press the **Public Sign Up** button. If you do not use a computer, you can contact Skagit 911 by phone at (360) 428-3200 so they can assist you with registering your information. See the form included inside this bulletin and follow the 4 easy steps.

Flood Insurance

Any property owner in the City of Burlington is eligible to obtain Flood Hazard Insurance, since the city participates in the National Flood Insurance Program. Purchasing or refinancing a home will trigger a requirement for flood insurance by the lender. Coverage in the event of flooding is not included in typical homeowner's insurance policies. Flood insurance is available through your own agency or broker and includes flooding from ponding/drainage problems, snowmelt flooding, runoff on hillsides, or any flooding involving surface water. Contents of the building are a separate addition to the policy. There is limited coverage available for flood-related erosion and mudslide. Replacement cost coverage is available for principal residences. *Concerned about high Flood Insurance Rates?* You may qualify for a substantial reduction if you have an Elevation Certificate that shows your home or business is located at or above the 100 year flood elevation. You will have to retain the services of a Licensed Engineer to complete the paperwork, unless an Elevation Certificate is on file already with the Building Department, so please check here first.

Lowering flood insurance premiums: Not only should the lowest floor be elevated but make sure that the floor of the crawlspace meets Technical Bulletin 11-01 and copies are available at the Permit Center. Flood insurance rates are higher for buildings with crawlspaces that are two feet or more below the lowest adjacent exterior grade. Also make sure that all mechanical equipment is elevated above the Base Flood Elevation (BFE). This includes ductwork, heat pumps, furnaces, and propane tanks or oil tanks. Make sure any garages that have the floor below BFE are also vented along with the crawlspace.

Natural & Beneficial Functions of Floodplains

Filling property to increase elevation in the floodplain is allowed today, but the long term goal is to minimize fill to protect fish and wildlife habitat. Burlington supports habitat improvements in the floodplain, and the Gages Slough restoration projects are a major effort in the city. Storm water quality monitoring in Burlington clearly shows that better water quality treatment systems are needed and this is a major focus of the surface water utility. The use of natural rain gardens is one of the ideas included in the low impact development approach that is being promoted as a way to get storm water runoff back into the ground, and to clean up water quality.

The Gages Slough habitat management plan has identified locations for restoration and water quality improvement projects. There are three complete restoration sites today, and about 15 more in need of work! The community is working towards the goal of clean water entering the Skagit River as the top priority, along with improving public access to habitat areas. The most exciting project is the plan to build a nonmotorized trail along Gages Slough that extends under I-5 at Cascade Mall, scheduled for construction in 2013.

Protecting agricultural lands is part of protecting the Natural and Beneficial Functions of Floodplains. The city has implemented the Burlington Agricultural Heritage Credit program which is a density bonus credit option that will help raise funds for farmland preservation in exchange for increased residential density in mixed use business and commercial areas of the city.

Key elements of the Skagit County Natural Hazard Mitigation Plan include protecting existing urban areas and preserving farmland and open space, looking at a variety of measures through the delta area to the mouth of the Skagit River, carefully coordinating and managing the hydroelectric power dams in the river system during a flood event, permanently moving homes and development rights out of the floodway, improving the environment for wildlife, and creating new public access opportunities to improve everyone's quality of life.

Map Determination & Library Information

A map determination is figuring out where the 100 year flood elevation is located relative to the first occupied floor of your home or business. This information is used to prepare an Elevation Certificate. A citywide system of elevation benchmarks is maintained in the Building Department. An average of an additional \$200 in savings is possible on your flood insurance policy if you have an elevation certificate, in addition to the 25% rate reduction available in Burlington as a result of community participation in the federal Community Rating System program. There are issues with lenders and flood insurance providers, and if you feel that you are not getting good information, please contact the city and we will try to help.

Information on other flood improvements, such as elevating your building, filling the crawl space, or floodproofing the lower portion, is available from the City and in the Burlington Public Library. There is a flood reference area in the library and staff will assist in directing you to the information you need.

Every land use newsletter includes a flood and natural hazard mitigation topic. Call the Planning Department at (360) 755-9717 to get on the mailing list! Take the time to participate because your ideas will be taken seriously and you will have a say in the future of your community.

Floodplain Development Permit Requirements

Before you build, add fill, or make changes to your property and structures, be sure to contact the Planning and Building Departments to determine if any permits or approvals are necessary. The Federal Emergency Management Agency and the insurance industry make frequent changes in the interpretation of floodplain standards, and you need to be sure you are using the most current information for any construction project.

**DO NOT DRIVE THROUGH
FLOODED AREAS.**

Drainage System Maintenance

This is the ninth year of water quality studies in Gages Slough and wetland restoration projects to improve water quality are a high priority. The commitment to long term maintenance, monitoring and habitat improvement is beginning to show, with the success of the first three wetland restoration projects that are beginning to mature. Clean water, efficient flow of water when needed, and a quality environment are the goals. Gages Slough and the Skagit River are important amenities for the community. Burlington is fortunate to have the Skagit Conservation District as a partner in Gages Slough water quality sampling. There is still a long way to go to deliver clean water to the River.

The drainage maintenance and inspection program is part of flood hazard mitigation. This year, every owner of a drainage system was mailed a Self-Inspection Checklist and asked to inspect and make corrections as needed to all detention ponds, pipes, catch basins and other drainage control structures, to ensure that the capacity of the ponds is maintained and that the ability of the system to clean the storm water is retained. The results are coming in and the city will do follow-up inspections, in addition to inspection and maintenance of the city street system. The public drainage system, including culverts, pipes and ditches is well maintained. Gages Slough is maintained at each street intersection and culvert location. A well maintained drainage system that functions in small storms will provide the best assistance possible in large storms and floods, by quickly and efficiently carrying the excess water out of town.

Thank you for respecting the signs that state “No Dumping – thank you” at public access points to Gages Slough! Each property owner along the Slough is responsible for cleaning up any litter or trash that is on their property. The problem of illegal dumping of yard waste in Gages Slough and the problem of trash dumped at points of public access to the River can only be solved if everyone helps out. It is illegal to dump or to fill along Gages Slough or the Skagit River. You may report illegal dumping (this includes yard waste) in the Slough, by calling the Code Compliance Inspector at 755-9715 or the Planning Department at 755-9717, or in writing.

CITY OF BURLINGTON

Planning Department

833 S. Spruce Street

Burlington WA 98233

Phone: (360) 755-9717

bplanning@ci.burlington.wa.us

What is MyStateUSA?

MyStateUSA is a community notification system that Skagit 911 may use to deliver alert messages to Skagit County residents and businesses via e-mail, text and / or phone calls in the event of an emergency or public warning.

Do you already have my phone number?

If you have standard "landline" service, yes we do. The Skagit 911 system database has listed and unlisted, business and residential phone numbers within Skagit County.

Cellular phones are not in the system database. If you would like to be contacted on your cell phone, you will need to register your number.

What kind of alert messages will I receive from MyStateUSA?

Any local elected or appointed public official or public safety command officer may request an alert message to be activated through the MyStateUSA system.

Examples of events that could prompt an alert activation include: evacuation notices, hazardous materials releases, community policing activities (*AMBER alerts, endangered missing adults, prisoner escapes, high incidence of criminal activity, etc.*)

When can I register my information?

Go to the home page at www.skagit911.com and click on the "Public Sign Up Here" button.

If you need additional information please email
skagit911@co.skagit.wa.us
or call 360-428-3200

SKAGIT 911

COMMUNITY NOTIFICATION SYSTEM:

Are you signed up to receive alert messages??

(NOTE: if you have standard "landline" service your phone number is already in the Skagit County 911 system)

1

- If you wish to be notified of alert messages by **Email** &/or by **Cell Phone(s)** you **must register** your email address and cell phone number(s) with MyStateUSA.
- Go to **STEP 2**.

2

- Do you have access to a computer?
- If **YES**, go to **STEP 3**.
- If **NO**, go to **STEP 4**.

3

- To register online go to: **www.skagit911.com**
- Click on "**PUBLIC SIGN UP HERE**" button and add your information as prompted.

4

- Contact Skagit 911 by phone at: **(360) 428-3200** to assist you with registering your information.

There is no guarantee that the emergency SMS message will be delivered in a timely manner. The carrier and Skagit 911 are not responsible for non-delivery. Normal text messaging rates may apply.
